

Sexual Wellness Treatment

Our providers work with patients to improve their sexual health and wellness through hormone therapy, surgical and nonsurgical procedures, general healthcare practices, as well as additional treatments.

Additional Treatments for Women:

Emsella – Using the power of focused electromagnetic energy this device will help you say goodbye to urinary incontinence issues

O-Shot – A nonsurgical procedure that stimulates vaginal and clitoral rejuvenation and healing to activate the female orgasm system

Exosomes – By harnessing their power, we can improve tissue regeneration, increase blood flow, and boost cellular communication.

Additional Treatments for Men:

Pulsewave – a revolutionary drug-free, surgery-free, and non-invasive therapy that uses pulsed acoustical waves, providing a breakthrough solution for men seeking better erections and optimal sexual performance.

P-Shot – a nonsurgical procedure that uses the growth factors a man has in his own body to stimulate penis rejuvenation, naturally.

TriMix – a penile injection used in the treatment of erectile dysfunction that is often used as an alternative to PDE5 inhibitors like Viagra, Cialis or Levitra.
